CORE BELIEFS OF MARXISM

(c) Drew Lowry 2010

- Marxists believe that the differences in socio-economic class divide people in much more significant ways than religion, race, ethnicity, gender, and geography.
- Class lines are drawn between:
 - **Bourgeoisie** - the "*Haves*" - those who control the world's natural, economic, and human resources
 - **Proletariat** - the "*Have-Nots*" - the majority of the global population who are living in substandard conditions and have always performed the labor that benefits the wealthy
